

2019 Red Cedar Speedway Weekly Race Event Order/Schedule

The following is the order and information regarding race events on a weekly basis. Race night event information, timing and rules are/will be posted at draw window and pit gate entrance (please make note). In order to get our nightly event in we need your cooperation in lining up in the "pit holding area" as the race before you enters the track. This is your responsibility; we will announce the next race as well over the loudspeaker but we will not wait for you as we are on a strict time schedule to get the whole show in within the restricted curfew timing. As the race before you finishes their race, we will be sending the next race onto the track. Please get lined up immediately when entering the track and listen for any instruction on your raceceiver. We will only be using the pace car for feature starts. Please note future announcements in-regards to any changes. Also note that if we are dealing with inclement weather the listed race event program could be modified.

SPIN RULE: When/if you are CHARGED with a 2nd (second) caution (for the race you are in) you will be "BLACK FLAGGED" and sent to the pits in any race you are entered in (Heat, B-Feature and/or Feature).

YELLOW FLAG RULES: AFTER the 2nd yellow flag flies, the field will go single file (restart) and dependent on time still available could go Green, white, checkered (GWC).

HOT LAPS: it is our goal to run hot laps the first 2-3 race events, then we may not run hot laps (dependent on track condition) any longer prior to starting race program on a weekly basis. Pay attention to posting at the draw window when you check your car in.

NOTE: We will hot lap every class week 1 and 2, we will have all cars (per class) enter the track, we will have ½ the field STAGE in the infield while group 1 is hot lapping. Then the next class will enter and so on. HOT LAPS will start at 6:00 pm sharp each of the first 2 nights and will be completed by 6:30 pm sharp. Follow the “flag mans” flag/light instructions as well as raceceiver instructions.
